

Moonshot Migrations

#BuiltOnAWS

Rebuild, don't migrate.

Traditional migrations move your problems to the cloud. Moonshot Migrations use agentic AI to rebuild your application from the ground up, purpose-built, cloud-native, and yours to own.

THE PROBLEM

Most migrations land on rehost or replatform: same tech debt, new address. You pay cloud costs on top of legacy fees and stay stuck.

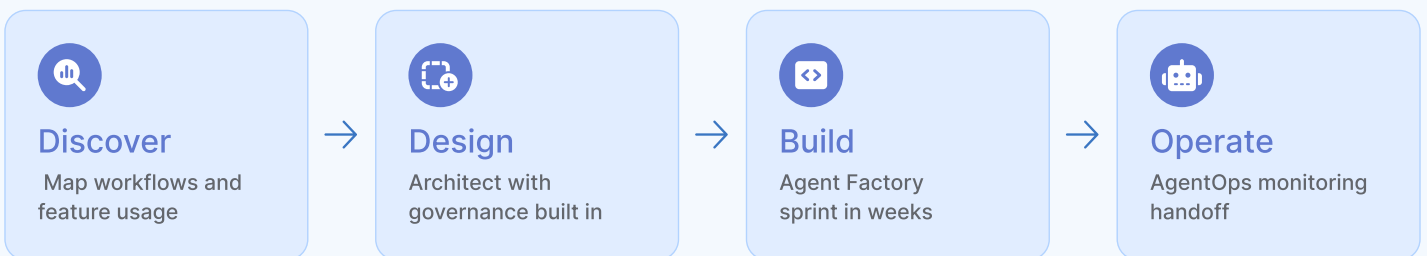

THE MOONSHOT APPROACH

We skip the 7R's entirely. We migrate your data and rebuild a new application from scratch using agentic AI, delivered in weeks, not months.

Traditional Migration vs. Moonshot

	TRADITIONAL	MOONSHOT
Approach	Move existing apps	Rebuild from scratch
Tech debt	Inherited	Eliminated
Timeline	6-18 months	4-12 weeks
Vendor lock-in	Preserved	Eliminated
Cost trajectory	License + cloud compound	One-time build + hosting
AI-native	Retrofitted	Built-in from day one

How it works

70-85%

Cost Savings

4-10 Weeks

To Production

\$0

Exit Costs & Price Increase

<\$1M/yr

Hosting on AWS

What You Get

Full Code Ownership

Every line of code is yours. No licensing, no dependency.

Inside Your Firewall

Runs in your AWS VPC. Data never leaves your environment.

Governance Built In

Policy-as-code, audit trails, and compliance evidence from day one.

Eliminate Tech Debt

Start clean. No legacy baggage carried forward from old platforms.

AI-Native Architecture

Agentic AI built in from day one, not retrofitted onto legacy systems.

AgentOps Included

Continuous observability, drift detection, and containment in production.

AgentOps Operations

Continuous Evaluation

Evaluates agent quality in production against policy.

Semantic Telemetry

Captures the meaning of agent decisions, not just logs.

Drift Detection

Alerts when agent behavior drifts from defined policies.

Graduated Containment

Proportional response: throttle, require approval, or restrict access.

Go Deeper: ISV Freedom Program

Replace specific vendors like Salesforce, SAP, ServiceNow, Workday, and 16 more. See vendor-specific TCO comparisons and agent replacement blueprints.

Ask for the ISV Freedom Program datasheet.
